(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Farmington, New Mexico, July 10, 1951

Well No. C-2 is located 1700 ft. from ^{XX}_N line and 1650 ft. from ^{XX}_E line of sec. 23
SW/4 of Section 23 T-27-N R-10-W NMPM
Fulcher (State name) (Twp.) San Juan (Range) (Meridian) New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6300 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)
Well was drilled to a total depth of 2240 feet with rotary tools. Cable tool rig moved onto location and well cleaned out to bottom.

Well was plugged back with pea gravel from 2240 feet to 2204 feet and was shot with 637 quarts SNG from 2132 feet to 2204 feet, with 5 feet pea gravel on top of shot on June 22, 1951. Well was cleaned out to bottom. 1-1/4" tubing was landed at 2199 feet. Well was shut in 72 hours.

Well measured 950 MCF per day after 3 hour blow down thru siphon string with Pitot tube through 2" pipe nipple July 7, 1951.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

REPORT ON THE SURVEY OF THE

The purpose of this survey was to determine the extent and character of the water resources of the area. The survey was conducted by the U.S. Geological Survey, and the results are presented in this report. The area surveyed is located in the State of California, and the survey was conducted during the year 1900. The results of the survey are presented in this report, and the data are given in the following tables.

The first table gives the area of the water resources of the area, and the second table gives the amount of water available for use. The third table gives the amount of water used for various purposes, and the fourth table gives the amount of water available for use after deducting the amount used for various purposes.

The fifth table gives the amount of water available for use after deducting the amount used for various purposes, and the sixth table gives the amount of water available for use after deducting the amount used for various purposes. The seventh table gives the amount of water available for use after deducting the amount used for various purposes, and the eighth table gives the amount of water available for use after deducting the amount used for various purposes.

The ninth table gives the amount of water available for use after deducting the amount used for various purposes, and the tenth table gives the amount of water available for use after deducting the amount used for various purposes. The eleventh table gives the amount of water available for use after deducting the amount used for various purposes, and the twelfth table gives the amount of water available for use after deducting the amount used for various purposes.

The thirteenth table gives the amount of water available for use after deducting the amount used for various purposes, and the fourteenth table gives the amount of water available for use after deducting the amount used for various purposes. The fifteenth table gives the amount of water available for use after deducting the amount used for various purposes, and the sixteenth table gives the amount of water available for use after deducting the amount used for various purposes.
