If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

A second approval is requested to retain this well in its present temporarily abandoned status. It is being evaluated as a possible candidate for a rework either in the Mesa Verde or Pictured Cliffs formations. The most recent bradenhead test indicated no evidence of a casing failure. The surface equipment is being checked periodically to insure there is no leakage of any substances at the surface.
