Testing: if percented by samples and lags.
Louging: Combination induction-ES Log from TD to surface casing. Detail Industion-ES Log and Sanic/Gomm Ray/Caliper Log thru Dakots, Gallup, and Pictured Cliffs. Aum equivination count band/domes hav los in conjunction with perforating.

Samples: Cultoct 10' samples from 1000' to 10. Drilling Time: Seelegraph from 200' to To. Standard Douth Messurements: SLM of drill pipe at approximately 300'

above the Laurer Sollup June, prior to 957, coring, and at 70. Completion Pregram: If commercial production is indicated in both the Sakete and Sallup Sands, the well will be completed similarly to Fullerton #6.
