LOG OF OIL OR GAS WELL

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED

The information given in this report is a copy of the original and correct record of the well and all work done thereon. It is to be used for the purpose of showing the work done and the results of the same. It is to be used for the purpose of showing the work done and the results of the same. It is to be used for the purpose of showing the work done and the results of the same.

1. The first step is to identify the key components of the system. This includes understanding the hardware, software, and data involved. For example, in a web application, this might involve identifying the server, database, and user interface.

• Moving to Shanghai to carry out business (from Moscow to Shanghai)

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked", or left in the well, give its size and location. If the well has been dynamited, give date, position, and amount of dynamite used. If the well has been plugged, state kind of material used, position, and results of plugging or balling of shoes. If plugs or bridges were put in to test for water, state kind of material used, position, and results of plugging or balling of shoes.
