Farmington, New Mexico, May 31, 1951

Well No. 4-1 is located 990 ft. from N line and 1065 ft. from E line of sec. 22
SW 1/4 of Section 22 27-N 10-W NMPN
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Fulcher-Kutz San Juan New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6105 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In May 20th, 1951, at 4:00 P.M. 5-1/2" casing was set at 1915 with 75 sacks of cement. Rotary rig was moved off of location, and cable tool rig rigged up for drilling cement plug and pay. On May 25th, 1951, hole was bailed dry and remained dry for two hours. Thirty-seven feet of solid cement was then drilled in bottom of pipe and hole again bailed dry. Hole remained dry for two hours which was considered a satisfactory water shut-off test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
