Well No. 17 is located 1000 ft. from S line and 1000 ft. from W line of sec. 17

17 (Sec. and Sec. No.) 17 (Twp.) 17 (Range) 17 (Meridian)
17 (Field) 17 (County or Subdivision) 17 (State or Territory)

The elevation of the derrick floor above sea level is 5352 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well is completed in the Pictured Cliffs sand and is making water either from a hole in the casing or a channel thru the cement. We propose to plug back with oil seal and determine if there is a hole in the casing. If so, we will squeeze cement the hole. If no hole is apparent, we will squeeze around the casing in an attempt to shut off water.

Well will be regraded with about 100 pounds of nitro glycerine or sand-traced if necessary.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
