## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Instead of setting 7 5/8" OD intermediate casing and 5 1/2" OD liner on this well, the well will be drilled to TD with mud and 5 1/2" OD, 15.54, J-55 casing will be run from surface to TD with staging collars below the base of the Pictured Cliffs and the base of the Gallup formations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
