13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

The Alice Bolack No. 11 is completed in the Pictured Cliffs and has not been stimulated for a long time. We feel that the PC still has potential, but since we had limited success refracing the PC in the past, we would like additional time to study the formation before we P&A the wellbore. Study/work is scheduled for 2003. However, Marathon will do the following work to properly TA the wellbore.

1. RU pulling. ND Wellhead. NU BOP.
2. TOOH w/96 jts 1.315" OD API line pipe (2034').
3. TIH w/bit & csg scraper to 1930'. POOH.
4. TIH w/5 1/2" CIBP for 13# csg. Set at 1918'. Open hole from 1978-2061'. Btm csg at 1978'.
5. Circulate 2% KCL w/corrosion inhibitor.
6. Test cst/CIBP to 500 psi for 30 min. (If MIT fails, TOOH, PU pkr and isolate leak.)
7. TOOH laying down tbg.
8. ND BOP. NU wellhead. RD pulling unit.

If csg/CIBP fails MIT, an AFE will be written to obtain approval to repair or P&A wellbore.

14. I hereby certify that the foregoing is true and correct
Name (Printed/Typed)
