Well No. 11 is located 1110 ft. from [N] line and 860 ft. from [W] line of sec. 12SW 1/4 SW 1/4 of Section 12
(1/4 Sec. and Sec. No.)T-27N
(Twp.)R-11W
(Range)N.M.P.M.
(Meridian)Basin Dakota
(Field)San Juan

(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (To be reported later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to an approximate total depth of 6420' with rotary tools to evaluate Dakota prospects. Stimulation and completion will be as indicated upon reaching total depth. The following casing program is proposed:

SIZE	DEPTH	CEMENT	REMARKS
------	-------	--------	---------

6-5/8"	150'	275 sz	Heat - circulate.
--------	------	--------	-------------------

4-1/2"	6420'		
--------	-------	--	--

Casing will be cemented by 2-stage method with stage tool set approximately 100' below base of Pictured Cliffs. First stage will consist of sufficient cement to fill 500' above top of Gallup. Second stage will consist of sufficient cement to fill 300' above top of Pictured Cliffs.

A copy of any survey taken will be submitted upon completion of well. Copies of location plate attached.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
