14. API NO.

15. ELEVATIONS (SHOW DF, KDB, AND WD)

6125 GR

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Justification for temporary abandonment:

This well has hole in casing and is not producing. Due to low deliverability of this well, our engineers are doing a study on estimated reserves to see if it is feasible to repair or replace this well.

Rig up work over unit, pull and inspect tubing, re-run tubing to 50' above Dakota perforations, spot a 50' cement plug, pull tubing up above plug and displace hole with corrosion treated fluid, land tubing and shut well in.

Prior to May 10, 1983, operator must submit an intent to repair, w/o, recomplete or P & A this well
