Re: British-American Oil Prod. Company
Fullerton Federal No. 6 - San Juan
County, New Mexico

Dear Sir:

The annual packer leakage test is scheduled for our Fullerton Federal No. 6 during June, 1966. This was a dually completed Gallup and Dakota well; however, the upper zone or Gallup has been abandoned for sometime. We therefore propose to deviate from the normal test schedule.

Our proposed packer leakage test for this well is as follows:

1. Eliminate Step 2, Step 3 and Step 4 of El Paso's annual packer leakage schedule (copy attached).
2. Both zones shut-in for 7 days; May 30 to June 6, 1966.
3. On June 6, 1966 blow down upper zone to atmosphere for a 3 hour period and tabulate both zones pressures at 15 minute intervals. (Pressure will be taken with dead weight tester).

Please advise your approval of this testing procedure.

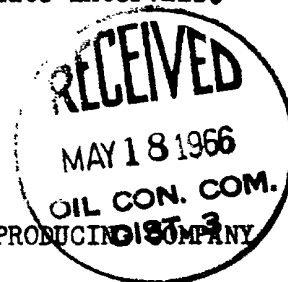

Yours very truly,

THE BRITISH-AMERICAN OIL PRODUCING COMPANY

Nae R. Stone
