12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Amoco Production Company requests permission to re-enter the Kutz Pictured Cliffs, West & Basin Fruitland Coal and Trimingle with the existing Wildcat Farmington Sand as per the attached procedure.

The Farmington (97143), Pictured Cliffs (79680) & Fruitland Coal (71629) pools are Pre-Approved for downhole trimmingling per NMOC Case No. 12520, Order No. R-11567 effective 04/26/2001. Although the interest owners are not identical between these three pools, this same order, established approval for subsequent applications for the downhole trimmingling of production in wellbores within the Gallegos Canyon Unit without notice to the unit interest owners, therefore, no additional notification is required prior to trimmingling approval.

We propose to allocate production to the PC & FC based on the decline rate as per the attached decline spread sheets. The remaining production will be allocated to the Wildcat Farmington. Trimmingling production downhole in the subject well from the proposed pools will not reduce the value of the total remaining production.
