Attention: Mr. William G. Webb

P
Gentlemen:

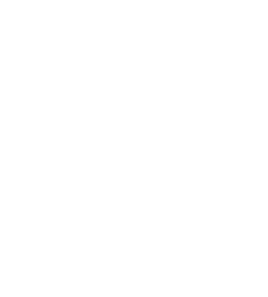

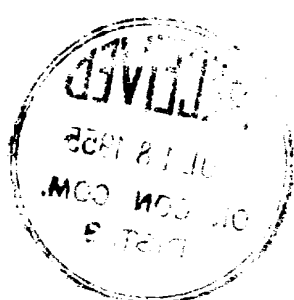

Reference is made to your letter of June 18, 1955, in which you requested information regarding the Christine Hughes Well No. 2, located in the SW/4 of Section 3, Township 27 North, Range 9 West, NMPM, San Juan County, New Mexico.

Y
With regard to the dual completion of this well, it will be necessary for you to submit to this office the data covering the dual completion, in the form of an application for permission to dually complete. It will not be necessary, however, for you to notify the offset operators or the working interests in said Section 3. Upon receipt of the dual completion application, we will validate completion of this well by administrative approval.

Regarding the pool designation of the Hughes Well No. 2, in view of the fact that the well is located within one mile of the Blanco-Mesaverde Gas Pool, it will automatically be governed by the Special Rules and Regulations for the Blanco-Mesaverde Pool, as set forth in Commission Order No. R-128-C. Because of the lack of development of the Dakota formation in this area, the Commission does not think it advisable at this time to create a Dakota Pool. Therefore your Dakota completion will be carried as an undesignated Dakota well. However, for the time being neither completion will be prorated by this Commission.

I would like to call your attention to the fact that the following forms have not been filed with our District Office in Aztec. These forms must be filed before any allowable can be granted to the well. The forms are: Form C-104, Form C-110, and Form C-122-B.

If we can be of any further assistance to you regarding these matters, please do not hesitate to contact us.

Very truly yours,

C. M. Rieder
Petroleum Engineer
