Re: Plugging Program Farming D Com #1 M-2-27N-9W

Dear Jim:

The plugging program for the referenced well is:

PB-2260	Lewis & PC
2080-1980	Fruitland
1500-1400	Kirtland
1240-1140	
210-110	
10 sacks at surface with marker	

If the casing is not pulled it must be perforated and squeezed so the cement plug will protect the inside and outside of the casing. Any casing stub requires a 100 foot plug.

If you have any further questions, please contact this office.

Yours truly,

A handwritten signature in cursive script that reads "Jeff A. Edmister".
