(Meridian)

Basin Dakota  
(Field)

San Juan  
(County or Subdivision)

New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 6005 ft. RMB

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Spudded 12-1/4" hole on January 15, 1961, and drilled to 348'. Set 8-5/8" casing at 347' with 205 sacks cement containing 2% calcium chloride. Circulated 20 sacks cement. After waiting on cement, tested 8-5/8" casing with 800 psi for 30 minutes, which held with no indication of pressure drop. Reduced hole to 7-7/8" at 348' and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
