The elevation of the derrick floor above sea level is 5783 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 24, 1951, the well was shot from 1672 to 1752' with 220 quarts of solidified nitro glycerin with the top of the solired trap at 1607'. The shot went off on time and well was cleaned out to a total depth of 1752'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
