P. O. BOX ~~871x~~ 2088
SANTA FE, NEW MEXICO

September 13, 1966

Pan American Petroleum Corporation
Security Life Building
Denver, Colorado 80202

Attention: Mr. Sidney B. Richards

Gentlemen:

Reference is made to your letter dated July 21, 1966, wherein you request authority to complete your M. W. Galt "H" Well No. 1, located in Unit L of Section 1, Township 27 North, Range 10 West, San Juan County, New Mexico, as a tubingless completion to produce gas from the Basin-Dakota Gas Pool through a full string of 2 7/8-inch casing which is to be run inside the existing 4 1/2-inch casing and cemented from the Baker Model "P" Packer set at 6300 feet to the surface. It is our understanding that this tubingless completion is to be utilized in an existing well as a means of casing repair and will be similar in all respects to the previously-approved casing-repair method approved for several other wells in the area which developed leaks.

Pan American Petroleum Corporation is hereby authorized to complete the aforesaid well in the above-described manner as a tubingless completion.

Very truly yours,

A. L. PORTER, Jr.
Secretary-Director

OIL CONSERVATION COMMISSION

P.O. BOX 8718
SANTA FE, NEW MEXICO

Dear Sir:

Enclosed for the Commission are two copies of a report on the results of the survey of the oil fields in the Santa Fe area, New Mexico, conducted by the Santa Fe Oil Company, Inc., during the year 1941.

Sincerely,
[Signature]

The enclosed report is a summary of the results of the survey of the oil fields in the Santa Fe area, New Mexico, conducted by the Santa Fe Oil Company, Inc., during the year 1941. The report is divided into two parts: a general description of the area and a detailed description of the oil fields. The general description includes a map of the area and a list of the oil fields. The detailed description includes a description of the geology, the oil fields, and the results of the survey. The report is intended to provide information to the Commission regarding the oil resources in the Santa Fe area.

Very truly yours,
[Signature]

Very truly yours,

Re: Application of Pan American Petroleum Corporation
For a Tubingless Completion, M. N. Galt "H" Well
No. 1, Basin Dakota Gas Pool, San Juan County,
New Mexico

Mr. A. L. Porter, Jr. (3)
New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico

Dear Sir:

Pan American Petroleum Corporation hereby respectfully requests your approval of a tubingless completion on its M. N. Galt "H" Well No. 1, Basin Dakota Gas Pool, San Juan County, New Mexico. The tubingless completion is to be utilized in an existing well as a means of casing repair. The attached plat shows the location of the M. N. Galt "H" Well No. 1 in Unit "L", Section 1, T27N-R10W, and the location of other nearby wells in the Basin Dakota Gas Pool. Your attention is specifically directed to the location of E. H. Pipkin Well No. 5 in Unit "A", Section 36, T28N-R11W; E. H. Pipkin Well No. 9 in Unit "N", Section 35, T28N-R11W; E. H. Pipkin Well No. 10 in Unit "E", Section 1, T27N-R11W; E. H. Pipkin Well No. 12 in Unit "G", Section 12, T27N-R11W; Fred Feasel "J" Well No. 1 in Unit "G", Section 34, T28N-R10W; and R. P. Hargrave "L" Well No. 1 in Unit "M", Section 4, T27N-R10W, which have previously been approved by you for tubingless completions as a means of affecting a casing repair. Your letters of August 16, 1965, February 27, 1964, September 23, 1964, July 30, 1965 and March 3, 1966, respectively, granted approval for repair of these wells.

The proposed tubingless completion on M. N. Galt "H" Well No. 1 will be similar in all respects to those affected on E. H. Pipkin Well No.'s 5, 9, 10 and 12, Fred Feasel "J" Well No. 1, and R. P. Hargrave "L" Well No. 1.

Mr. A. L. Porter, Jr.
July 21, 1966
Page 2

M. N. Galt "H" Well No. 1 was completed March 3, 1960, as a Basin Dakota Gas Pool Well. As may be seen by the attached well bore sketch of the well, 4-1/2" casing was set at 6645' and the well was selectively notched or perforated and stimulated for completion in the Dakota formation. The 4-1/2" casing was cemented by the two stage method with a DV tool set at 2200' just below the Pictured Cliffs formation.

A leak has occurred in the 4-1/2" casing opposite the Mesaverde interval (approximately 3500 to 4700'). As shown by the attached sketch of the well, it is proposed to repair this casing by running a full string of 2-7/8" tubing inside the existing 4-1/2" casing, land it just above the Dakota perforations, and cement it to the surface. The mechanical condition of the well following this repair is shown on the attached sketch.

In connection with this Application, Pan American also states that the well is not a wildcat and that the well will not be a dual completion.

Yours very truly,

PAN AMERICAN PETROLEUM CORPORATION

Sidney B. Richards
Joint Interest Superintendent
