17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is requested that a continuance of the current shut-in status of the subject well be granted for an indeterminate period of time for the following reason:

1. The results of the recompletion of the Mudge "A" No. 7 (NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 6-T27N-R11W) were to have determined the feasibility of pursuing a similar course in the case of the subject well. (See Sundry Notice Form 9-331 for subject well approved May 10, 1983). The degree of success achieved by recompleting the Mudge "A" No. 7 is unknown since the gas purchaser, to date, has failed to provide a production sales outlet. Until the Mudge "A" No. 7 has been on producing status for a sustained period of time, the economic practicality of recompleting the subject well will remain a moot question.
