

JAMES D. HANCOCK AND COMPANY, LTD.
KIRBY BUILDING, 1509 MAIN ST.
DALLAS 1, TEXAS

August 22, 1951

Mr. P. T. McGrath, District Engineer
UNITED STATES GEOLOGICAL SURVEY
P. O. Box 965
Farmington, New Mexico

Dear Mac:

Since the time that you approved the application to drill the Hancock # 3, a decision has been reached to drill the well with rotary and complete with cable tools, rather than to drill with cable tools all the way.

Attached hereto is new application reflecting that decision.

Please give this the earliest attention that you can.

Yours very truly,

JAMES D. HANCOCK & COMPANY, LTD.
