## NORTHWEST NEW MEXICO PACKER LEAKAGE TEST INSTRUCTIONS

- up to a nove.

  We Test No. 2 shall be conducted even though no leak was indicated during flow Test No. 1. dure for Flow Test No. 2 is to be the same as for Flow Test No. 1

- NORTHWEST NEW MEXICO PACKER LEAKAGE TEST INSTRUCTIONS

  1. A packer leakage sest shall be commenced on each multiply completed well within seven days after actual completion of the well, and assumily thereafter as prescribed by the order authorizing the multiple completion. Such tests shall also be connected on all smitule completions within seven days following recompletion and/or chemical or first-ture treatment, and whenever remedial work has been done on a well during which the packer or the subing have been disturbed. Tests shall also be taken at any time that communication is suspected or when requested by the Division.

  2. At least 72 hours prior to the commencement of any packer leakage test, the operators shall also be so notified.

  3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization, both zones shall remain shut-in write the well-lead pressure in each has stabilized, provided however, that they need not remain shut-in more than seven days.

  4. For flow Test No. 1, one zone of the dual completions shall be produced at the normal rate of production while the other zone remains shut-in. Such test shall be continued for seven days if the case of a roll well. Note: if, on an initial packer leakage test, a gas well is being flowed to the atmosphere due to the lack of a pipeline connection the flow period shall be three hours.

  5. Following completion of flow Test No. 1, the well shall again be shut-in, in accordance with Paragraph 3 above.

  6. Flow Test No. 2 shall be conducted even though no leak was indicated during flow Test No. 1.

  7. Pressures for gas-none tests small be interests as follows: 3 hours tests similar the man shut-in while the zone which has been days for gas-none tests small be measured on each stable interests as follows: 3 hours tests: introduced; 5 hours interests as follows: 3 hours tests: introduced; 5 hours interests as follows: 3 hours tests: introduced; 6 period, at fleast one time during the first hour immediately

  - Test form Revised 10/01/78 with all deadweight pressures indicated thereon as well as the flowing temperatures (gas zones only) and gravity and GOR (oil zones only).
