DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Market set on surface casing by welding 4' piece of closed pipe to threaded collar, same screwed on tightly to prevent junk from being thrown in hole so surface casing and existing hole could be later utilized.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
