13. Describe Proposed or Completed Operations

BLM approval for the completion and commingling of the Fruitland Coal and Pictured Cliffs formations was received 7-10-92. After moving the rig on location to perform this work, it was found that the casing had extensive holes below 1420'. These holes forced the cancellation of the intended workover operations. The rig was held indle until BLM approval for the plug & abandonment could be obtained. Verbal approval for the attached procedure was obtained 11-23-92 @ 7:45 am from S. Mason.
