(NOTE: Report results of multiple completion or zone change on Form 9-330.)

BUREAU OF LAND MANAGEMENT  
FARMINGTON DISTRICT OFFICE

(other) Request for Temporary SI Status

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It is requested that an extension of the current temporary shut-in classification of the subject well be granted for the following reason:

The results of the recompletion of the Mudge "A" No. 7 (NW/4 SW/4 Sec. 6-T27N-R11W) were to have determined the feasibility of undertaking a similar procedure in the case of the subject well. (See Sundry Notice Form 9-331 for subject well, approved August 29, 1983). The measure of success achieved as a result of the recompletion of the Mudge "A" No. 7 is uncertain at this time since initial gas sales did not commence until 3-29-84. Until the Mudge "A" No. 7 has been on a producing status for a sustained period of time, the economic feasibility of recompleting this well is uncertain.

This Approval Or Temporary  
Abandonment Expires Nov 29, 1984
