

THE APPLICATION OF EL PASO NATURAL GAS COMPANY FOR PERMISSION TO EFFECT DUAL COMPLETION OF ITS SCHWERTFEGER WELL NO. 10-A (PM), LOCATED IN THE SW/4 SW/4 OF SECTION 31, TOWNSHIP 28 NORTH, RANGE 8 WEST, NMPM, SAN JUAN COUNTY, NEW MEXICO, TO PRODUCE GAS FROM THE SOUTH-PICTURED CLIFFS GAS POOL AND THE BLANCO MESAVERDE GAS POOL.

ORDER NO. DC-509

ADMINISTRATIVE ORDER
OF THE OIL CONSERVATION COMMISSION

Under the provisions of Rule 112-A (c) El Paso Natural Gas Company, made application to the New Mexico Oil Conservation Commission on November 6, 1957, for permission to dually complete its Schwerdtfeger Well No. 10-A (PM), located in the SW/4 SW/4 of Section 31, Township 28 North, Range 8 West, NMPM, San Juan County, New Mexico, to produce gas from the South Blanco-Pictured Cliffs Gas Pool and gas from the Blanco Mesaverde Pool.

Now, on this 6th day of November, 1957, the Secretary-Director finds:

- (1) That application has been duly filed under the provisions of Sub-section 'c' of Rule 112-A of the Commission's Rules and Regulations;
- (2) That satisfactory information has been provided that all operators of offset acreage have been duly notified; and
- (3) That waiver of objection has been received from the only known offsetting operator.
- (4) That the proposed dual completion will not cause waste nor impair correlative rights.
- (5) That the mechanics of the proposed dual completion are feasible and consonant with good conservation practices.

IT IS FURTHER ORDERED:

That the applicant herein, El Paso Natural Gas Company, be and the same is hereby authorized to dually complete its Schwerdtfeger Well No. 10-A (PM), located in the SW/4 SW/4 of Section 31, Township 28 North, Range 9 West, NMPM, San Juan County, New Mexico, to produce gas from the South Blanco-Pictured Cliffs Gas Pool and gas from the Blanco Mesaverde Gas Pool, through the casing-tubing annulus and the tubing respectively.

PROVIDED HOWEVER, That subject well be completed and thereafter produced in such a manner that there will be no commingling within the well-bore, either within or outside the casing, of gas, oil and gas, or oil produced from either or both of the separate strata,

PROVIDED HOWEVER, That prior to the actual dual completion the operator shall make pressure tests of the casing to prove that no casing leaks exist. In the event a casing leak is apparent the operator shall take appropriate steps to adequately repair the leak. The results of these tests shall be reported to the Commission on Form C-103.

PROVIDED FURTHER, That upon the actual dual completion of such subject well applicant shall submit to the appropriate District Office of the Commission copies of Oil Conservation Commission Form C-103, Form C-104, Form C-110 and Form C-122, outlining the information required on those forms by existing Rules and Regulations, and two copies of the electric log of the well.

PROVIDED FURTHER, That said subject well for dual completion and production shall be equipped in such a way that reservoir pressures may be determined separately for each of the two specified strata, and further, be

equipped with all necessary connections required to permit recording meters to be installed and used at any time as may be required by the Commission or its representatives, in order that natural gas, oil, or oil and gas from each separate stratum may be accurately measured and the gas-oil or gas-liquid ratio thereof determined, and

PROVIDED FURTHER, That the operator shall make any and all tests, including segregation and packer-leakage tests upon completion and annually thereafter during the Deliverability Test Period for the Blanco Mesaverde Pool, commencing in the year 1958, and whenever the packer is disturbed, but not excluding any other tests and/or determinations as deemed necessary by the Commission; the original and all subsequent tests shall be witnessed by representatives of offset operators if any there be at their election, and the results of each test, properly attested to by the applicant herein and all witnesses, shall be filed with the Commission within fifteen (15) days after the completion of such tests, and further, that applicant shall file with the Commission in duplicate a packer-setting affidavit, which affidavit shall be due within fifteen (15) days of the dual completion or whenever the packer is disturbed, and

PROVIDED FURTHER, That upon the actual dual completion of such subject well, applicant shall submit to the Commission a diagrammatic sketch of the mechanical installation which was actually used to complete and produce the seal between the strata, and a special report of production, gas-oil ratio or gas-liquid ratio, and reservoir pressure determination for each producing zone or stratum immediately following completion.

IT IS FURTHER ORDERED, That jurisdiction of this cause is hereby retained by the Commission for such further order or orders as may seem necessary or convenient for the prevention of waste and/or protection of correlative rights; upon failure of applicant to comply with any requirement of this order after proper notice and hearing the Commission may terminate the authority hereby granted and require applicant or its successors and assigns to limit its activities to regular single-zone production in the interests of conservation.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for ensuring the integrity and transparency of financial data. This section also outlines the various methods used to collect and analyze data, highlighting the need for consistency and accuracy throughout the process.

The second part of the document focuses on the specific procedures for data collection and analysis. It details the steps involved in gathering data from various sources, including interviews, surveys, and archival records. The text also describes the methods used to analyze the data, such as statistical analysis and qualitative coding. This section is crucial for understanding how the data was processed and interpreted, ensuring that the findings are based on reliable and valid information.

The third part of the document presents the results of the study. It includes a detailed description of the data collected and the findings of the analysis. The text discusses the patterns and trends observed in the data, as well as the implications of these findings for the research. This section is designed to provide a clear and concise summary of the study's outcomes, allowing readers to understand the key findings and their significance.

The final part of the document discusses the conclusions and recommendations of the study. It summarizes the main findings and provides suggestions for future research. The text also addresses any limitations of the study and offers insights into the broader context of the research. This section is important for providing a comprehensive overview of the study and its contributions to the field.
