DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It was intended to complete this well in the Pictured Cliffs and Mesa Verde formations. The Pictured Cliffs formation was found to be non-commercial, therefore, the well was completed in the Mesa Verde formation only.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
