LOG OF OIL OR GAS WELL

LOCATE WELL CORRECTLY.

A blank sheet of graph paper with a grid pattern. The grid consists of small squares formed by horizontal and vertical lines. There are approximately 20 columns and 25 rows of squares. A thick black border surrounds the grid area. In the top left corner, there is a small, dark, irregular mark that looks like a staple or a piece of tape. The paper appears slightly aged or off-white.

The information given herewith is a complete and correct record of the well and all work done thereon so far as can be determined from all available records.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "backed" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If piers or bridges were put in to test for water, state kind of material used, position, and results of pumping or baling.
