Application For Unorthodox Location - Rule 104 F(2)
Florance #64 / Florance D10A Well
970' FSL, 2370' FEL, Unit O Section 17-T27N-R8W
Blanco Mesaverde (Pool IDN 72319) and Basin Dakota (Pool IDN 71599) Pools
San Juan County, New Mexico

Amoco Production Company hereby requests administrative approval for an unorthodox well location for the Florance #64 well in the Basin Dakota Pool and the Florance D10A well in the Blanco Mesaverde Pool. This well was drilled in 1966 by Tenneco Oil Company and has produced for the past 30 years from the Dakota. We have searched and are unable to locate a non-standard location order for this well in the Dakota. We were also unable to find such an order in the Aztec District files. Presently, Amoco plans to recomplete this well to the Mesaverde and commingle production from the Mesaverde and the Dakota formations. This well would also be unorthodox in the Mesaverde.

Amoco is the operator of the Mesaverde spacing unit towards which this well encroaches and the encroachment in the Dakota would be toward the center line of the spacing unit so no offset operator notice is required. Attached are plats showing the location of the well, topography, and all wells drilled in the area.
