17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In order to repair the communication between the two zones, it is intended to pull both strings of tubing, redress seal assembly and rerun both tubing strings, replacing all bad joints. If the seal assembly cannot be pulled, the packer will be milled out, and a new packer will be set to isolate the zones. This is in accordance with the rules of the New Mexico Oil Conservation Division.
