Re: The British-American Oil Producing Company's  
Fullerton #8 Located 1500' FNL and 1800' FEL,  
Section 14-27N-11W. San Juan County, New Mexico

Gentlemen:

Order No. R-1670-C states, "All wells drilled to or completed in the Basin-Dakota gas pool shall be located no nearer than 790' to the boundary line of the proration unit and shall be located no nearer than 130' to a governmental quarter-quarter section line or subdivision inner boundary line. In the event any such well is completed as an oil well at a location nearer than 330' to a governmental quarter-quarter section line, said well shall not be produced unless and until such time as the unorthodox oil well location has been approved by the Commission after notice and hearing."

The British-American Oil Producing Company's Fullerton #8 was drilled at a location 1500' FNL and 1800' FEL. This location is proper for a Dakota gas pool. However, the Gallup Sand was found productive at this location and is consequently an unorthodox location for an oil well since it is located 180' from the nearest quarter-quarter section line. The well was initially staked 1850' FNL and 1980' FEL of Section 14 but was moved because of inaccessible terrain. The original location would have been off a fifty foot cliff running in a general east-west direction. Therefore, it was necessary to move the location north and east. Administrative approval is herein requested by your authority under Rule No. 3 of Order No. R-1670-C. A copy of our application has been sent to each offset operator and all operators within the section in which this well is located.

The British-American Oil Producing Company's  
Fullerton #8 Located 1500' FNL and 1800' FEL,  
Section 14-27N-11W, San Juan County, New Mexico  
Page No. 2

---

Fullerton #8 is within one mile of the forty acre Gallup oil proration unit dedicated to the British-American Fullerton #6 which is located 790' FWL and 1650' FNL Section 11-27N-11W.

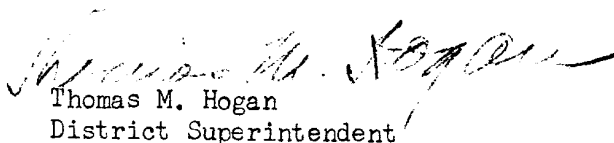

Attached to this letter you will find the following information:

- (1) Plat showing the location of all wells on applicant's lease, all offset wells on offset leases and a list of the names and addresses of operators of all leases offsetting applicant's lease.
- (2) Evidence that said offset operators have been furnished copies of the application.
- (3) Electrical log of the well with tops and bottoms of the producing zone and interval of perforation indicated thereon.

A separate application has been filed requesting authority to dually complete Fullerton #8 as a Dakota gas and Gallup oil well.

Very truly yours,

THE BRITISH-AMERICAN OIL PRODUCING COMPANY

  
Thomas M. Hogan  
District Superintendent
