

OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

May 31, 1961

The British-American Oil Producing Co.
P. O. Drawer 330
Farmington, New Mexico

Attention: Mr. W. R. Stone

Administrative Order TX-11

Gentlemen:

Reference is made to your letter of May 10, 1961, wherein you request authority to complete your Federal Fullerton Well No. 8 located in the SW/4 NE/4 of Section 14, Township 27 North, Range 11 West, NMPM, San Juan County, New Mexico, with 4 1/2-inch OD non-upset casing and produce the Gallup hydrocarbons through said casing string as a tubingless completion.

Inasmuch as you expect that the Gallup will produce with a gas-liquid ratio in the neighborhood of 200,000 to one, there should be no production problem or waste encountered by your proposed completion.

British-American is, therefore, hereby authorized to complete and produce the subject well in accordance with the procedure outlined in your letter of May 10, 1961.

The Commission does reserve the right, however, to review this matter at any time that it appears waste may be resulting from the proposed method of production. It is also

CONSERVATION OF THE OIL

The conservation of the oil is a very important factor in the life of the oil field. It is the responsibility of the oil field engineer to conserve the oil and to produce it in the most efficient manner possible.
