ABANDONMENT* ☐

(NOTE: Report results of multiple completion or Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Drilled in 1926 to a depth of 625'. The well was abandoned because of crooked hole. It was used as a water supply well for drilling #8-A, but has not been used as a water supply well since that time. We propose to plug and abandon the well as follows:

Spot 20 sack plug at base of Tropic Formation 565-585',
and 20 sack plug at top of Tropic Formation from 450-474'.
10 sack plug at 69' (Base of 12 1/2" surface pipe).
5 sack plug at surface.
Set dry hole marker and clean location.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

Subject: WELLS IN TABLE MESA FIELD

Dear Sir,

Conoco has recently been in discussions with your Charlie Perrin regarding a group of wells in the Table Mesa field that are uncontrollably flowing fluids to the surface. Through these conversations, Conoco understands that there is a possibility that we might be responsible for three of the identified wells.

We are presently in the process of searching Conoco's and public records to identify the responsibility for the wells. We do not believe that we will have completed our search before your operations personnel will be ready to move onto the three wells in question. Therefore, we propose that you continue with your present plans for plugging these wells.

Once we complete the search, we will be happy to share the results. In addition, we will inform you of our responsibilities associated with these wells.

I would also like to take this opportunity to thank Mr. Perrin for taking the initiative to contact and allowing us to work with you on this issue. Allowing us to know about the situation before you begin work on the wells gives us all an opportunity to do what is best for the environment, public and industry.

Yours Truly,

W. E. (Bill) Hudson
