It is our intention Pictured Cliff for	m to drill well #1 approximately 2200' to test the mation. Casing program is as follows: 130' of 10	 3/4*					
It is our intention Pictured Cliff for casing to be come	m to drill well #1 approximately 2200° to test the mation. Caming program is as follows: 130° of 10 Med with 150 sacks regular communt. 2100° 7° 00 or	10 3/4*					
It is our intention Pictured Cliff for casing to be commuted to be semented with	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	 3/4*					
It is our intention Pictured Cliff for casing to be come	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	 3/4*					
It is our intention Pictured Cliff for casing to be commuted to be semented with	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	 3/4*					
It is our intention Pictured Cliff for casing to be commuted to be semented with	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	10 3/4*					
It is our intention Pictured Cliff for casing to be commuted to	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	 3/4*					
It is our intention Pictured Cliff for casing to be commuted to be semented with	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	 3/4*					
It is our intention Pictured Cliff for casing to be commuted with is the SE/A, Section 15 the	m to drill well #1 approximately 2200° to test the mation. Caming program is as follows: 130° of 10 sted with 150 sacks regular semant. 2100° 7° 00 each 150 sacks commit. The designated drilling unit is 1.	ie 3/4ª Ming					
It is our intention Pictured Cliff for casing to be commuted with is the SE/A, Section 15 the	m to drill well #1 approximately 2200° to test themation. Caming program is as follows: 130° of 10 test with 150 sacks regular sement. 2100° 7° 00 each 150 sacks coment. The designated drilling unit	ie 3/4ª Ming					
It is our intention Pictured Cliff for casing to be commuted with is the SE/A, Section I understand that this plan of work n	m to drill well #1 approximately 2200° to test the mation. Caming program is as follows: 130° of 10 sted with 150 sacks regular semant. 2100° 7° 00 each 150 sacks commit. The designated drilling unit is 1.	ie 3/4" Heing					
It is our intention Pictured Cliff for casing to be committed with is the SE/A, Section I understand that this plan of work no company	m to drill well #1 approximately 2200° to test the mation. Casing program is as follows: 130° of 10 Med with 150 sacks regular semant. 2100° 7° 00° each 150 sacks commit. The designated drilling wait was 1.	Me 3/A** Me ing					
It is our intention Pictured Cliff for casing to be commuted with 1s the SE/A, Section I understand that this plan of work normany Skally Oll dedress Sex 426,	m to drill well \$1 approximately 2200° to test the mation. Caming program is as follows: 130° of 10 Mod with 150 sacks regular count. 2100° 7° 00 of th 150 sacks commit. The designated drilling unit is 1.	Me 3/A** Me ing
