17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is intended to repair the casing failure by pulling the tubing and packer, setting a bridge plug above the perforations, and isolating the casing failure. The leak will be squeeze cemented with a sufficient amount of cement to isolate the failure. Following clean out, the casing will be tested to 600 psi, the bridge plug drilled and the production tubing rerun.
