- ☐ New Construction
- ☐ Non-Routine Fracturing
- ☐ Water Shut-Off
- ☐ Conversion to Injection
- ☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Dugan requested that this well be temporarily shut-in until production from the offsetting Bengal C #6 could be tested. We have been unable to properly test the Bengal C #6 due to large volumes of water. We have maintained production from the Bengal C #5 while testing the C #6 well. This well has been producing since our last sundry notice. We plan to continue to produce the Bengal C #5 until a decision can be made about connecting the Bengal C #6. We are working with the NMOCD to determine how we may be able to produce both the C #5 and C #6 wells which are both in the same spacing unit for Pictured Cliffs/Fruitland Sand. Since the C #5 is producing, no casing test should be needed.

14. I hereby certify that the foregoing is true and correct
