17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We have this well shut in pending further evaluation of the completion procedures. The well is perforated in the Dakota and Greenhorn formations with a cast iron bridge plug and 5 sx cement between. The condition of surface equipment, casing and cement is considered such that surface leakage, migration of fluids or contamination of fresh water will not occur.

Your request for a 60 day extension is approved until November 24, 1980. If you are unable to complete this well by Nov. 24 please furnish to this office information why this well should not be plugged.

18. I hereby certify that the foregoing is true and correct
