

EXHIBIT "D"

Multipoint Surface Use and Operations Plan

1. Existing Roads:

- A. The proposed well site is shown on Exhibit "A".
- B. Exhibit "E" shows the existing access roads to the proposed location. The site is located 11 miles south of Bloomfield Highway 44, then 3 miles southwest, and then 3/4 mile northwest to the location.
- C. Final access roads into the site are coded green.
- D. This well is classified as development and roads are shown on Exhibits "E" and "F".
- E. The existing gravel roads will be maintained during the drilling phase of this well. No improvements are planned.

2. Planned Access Roads:

- (1) Width will not exceed 20 feet.
- (2) Maximum grades will not exceed 5%.
- (3) No turnouts are to be constructed.
- (4) No additional drainage construction is deemed necessary other than minor ditching.
- (5) No culverts, cuts, or fills are required.
- (6) The use of surfacing material is not planned at this time.
- (7) No gates, cattleguards, or fence cuts are necessary.
- (8) The new access road into the location is flagged.

3. Location of Existing Wells:

All existing wells are shown on Exhibit "F".

- (1) Water wells - No shallow, domestic nor deep, high volume wells are known to be in the immediate area.
- (2) Abandoned wells - none
- (3) Temporarily abandoned wells - none
- (4) Disposal wells - none
- (5) Drilling wells - none
- (6) Producing wells - as shown on Exhibit "F"
- (7) Shut in wells - none
- (8) Injection wells - none
- (9) Monitoring or observation wells for other resources - none

4. Location of Existing and/or Proposed Facilities:

- A. Existing facilities owned or controlled by operator within a one-mile radius of this location:
 - (1) No tank batteries

- (2) One West Kutiz Pictured Cliffs well - The Mudge "B" 1 (NE $\frac{1}{4}$ - Sec. 29)
 (3) No oil gathering lines
 (4) No gas gathering lines
 (5) No injection lines
 (6) No disposal lines
- B. Proposed facilities in the event of a producing well are shown on Exhibit "H".
 (1), (2) - As shown on Exhibit "H"
 (3) Area to be used will be levelled. Native material will be used in the construction of the location.
 (4) The pit will be fenced and flagged to discourage the entry of livestock, wildlife, and waterfowl.
 C. All disturbed areas not needed for operations will be rehabilitated in the manner described in Item 10.

5. Location and Type of Water Supply:

- A. Water will be obtained from the San Juan River or purchased from private sources.
 B. Water will be hauled by truck.
 C. No water well will be drilled on the lease.

6. Source of Construction Materials:

A, B, C, and D - No construction material is needed except as previously noted. Any materials required will be purchased from private sources.

7. Methods for Handling Waste Disposal:

- (1) Drill cuttings will be buried in the reserve pit.
 (2) Drilling fluids will be placed in the reserve pit and allowed to evaporate.
 (3) Produced fluids such as oil and formation water will be collected in a test tank.
 (4) Sewage will be contained and a suitable chemical will be used to decompose waste.
 (5) Garbage and other waste material will be placed in a trash pit and burned and later buried.
 (6) Upon completion of drilling, all trash and litter will be buried in the trash pit. The reserve pit will be fenced until dry at which time it will be backfilled.

8. Ancillary Facilities:

No camps or airstrips are planned

9. Well Site Layout:

- (1) See Exhibit "G"
 (2) See Exhibit "H"
