(NOTE: Report results of multiple completion or zone change on Form 9-330.)

(other) Proposed Surface Use Plan - Install Flowline

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Refer to NTL-6 for subject well approved as amended 3-26-81. Multipoint Surface Use and Operations Plan Item 4 (B) modified as follows:

It is proposed to install a common flowline tying the Federal 31 No. 43, Federal 31 No. 21 (NE/4 NW/4, Sec. 31), and the Federal 31 No. 31 (NW/4 NE/4, Sec. 31) to a proposed connection with the existing FNL lateral line located in the NE/4 SE/4, Sec. 31-T27N-R11W. Production from each well will be individually metered prior to entry into the common flowline.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

Coated, Wrapped, and Welded Flowline Specifications

Size	2"
Grade	A-25
Wall Thickness	0.154"
Yield Pressure	4536 psi
Test Pressure	720 psi
Max. Allow. Pressure	1127 psi
Operating Pressure	250 psi
ROW Width	30'
ROW Length	5310.85'
Installation Depth	4' Min

A map detailing this proposal is herewith attached. DEPCO, Inc. has previously obtained archeological clearance in the affected area. Surface management is under BIA supervision. The starting date of this project will be contingent upon the approval date of this proposal. Surface restoration will be in compliance with BIA recommendations.
