Re: Request for exception to Well Location Requirements

Gentlemen:

Energy Reserves Group, Inc. respectfully requests approval for the below described well location due to topographical conflicts.

The site as originally staked fell directly in the Kutz Canyon West which is a continously flowing drainage. Summer rains usually create flash flooding down this wash. It is necessary to place the well location at the described footage to minimize the possibility of flooding. Please see attached plat and topo map for a description of surface features.

All Offset Operators have been notified by Certified Mail as of July 16, 1981.

If there are any problems or questions please call.

Very truly yours,
