Attention: Sylvia F. Little

Administrative Order NSL-2761

Dear Ms. Little:

Reference is made to your application of February 14, 1990 for a non-standard coal gas well location for your existing **Wiedemer Well No. 3** located 1700 feet from the South line and 790 feet from the East line (Unit I) of **Section 34, Township 27 North, Range 10 West**, NMPM, Basin Fruitland Coal (Gas) Pool, San Juan County, New Mexico, which is presently completed in the Fulcher Kutz-Pictured Cliffs Pool. The S/2 of said Section 34 shall be dedicated to the well forming a standard 320-acre gas spacing and proration unit for said pool.

By the authority granted me under the provisions of Rule 8 of the Special Rules and Regulations for the Basin-Fruitland Coal (Gas) Pool as promulgated by Division Order No. R-8768, the above-described unorthodox coal gas well location is hereby approved.

Sincerely,

William J. LeMay

Re: #3 Wiedemer Coal Seam Test
NE SE I-34-27N-10W, San Juan Co., NM

Dear Mr. LeMay:

Administrative approval is hereby requested for a coal seam test in an unorthodox location.

The #3 Wiedemer was completed in 1983 in the Pictured Cliffs formation. It is our intention to plug back to the Fruitland and test that formation for natural gas production.

Waivers of Objection are being sent certified mail to offset operators requesting that they return one copy to NMOCD Santa Fe office and one copy to our office.

We attach copies of location plats for this well, and a plat showing offset ownership wells. If further information is required, please let us know. Thank you.

Very truly yours,

SYLVIA F. LITTLE
