Gentlemen:

I have examined the application dated 9-22-82  
for the Tenneco Oil Co. Jackson Com #1E I-8-28N-9W  
Operator Lease and Well No. Unit, S-T-R

and my recommendations are as follows:

Approval  
This has very bad topography and a NSP in sections 8+9.  
There is a more standard location available in NW 1/4 of section  
9, but it would put the two wells close together.

Yours truly,

Jeff A. Edmister

Application for Unorthodox Location  
Jackson Com 1E  
1690' FSL 30' FEL, Sec 8, T28N, R9W  
San Juan County, New Mexico

Gentlemen:

Attached in duplicate (to each office) are a well location plat (C-102) with an ownership plat for the above referenced well.

Due to steep topography and the unusual size and shape of the spacing unit, the well could not be located where it conforms to state spacing requirements. This is the only geologic and topographic site acceptable.

A copy of this application is being submitted to all offset operators by certified mail with a request that they furnish your Santa Fe office with a waiver of objection.

Pursuant to the authority of Rule 104-F we respectfully request your approval of an exemption to the standard well location requirements.

Yours very truly,

TENNECO OIL COMPANY

Ken Russell  
Senior Production Analyst

Attention: Ken Russell

Administrative Order NSL-1587

Gentlemen:

Reference is made to your application for a non-standard location for your Jackson Com Well No. 1-E to be located 1690 feet from the South line and 30 feet from the East line of Section 8, Township 28 North, Range 9 West, NMPM, Basin Dakota formation, San Juan County, New Mexico.

By authority granted me under the provisions of Rule 104 F of the Division Rules and Regulations, the above-described unorthodox location is hereby approved.

Sincerely,

JOE D. RAMEY  
Director
