13. Describe Proposed or Completed Operations (Clearly state all pertinent detail, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Bonneville Fuels Corporation proposes to install 25' of 4" nominal welded steel gas pipeline (Grade B, .156" wall thickness, yield strength/hoop stress is 1638 psi) to connect the CDP #2 to Williams Company gas gathering system. The entire proposed pipeline is on Federal Lease # SF078094 and will be buried at a depth of 48". The pipeline will cross an existing road on previously disturbed ground. The maximum operating pressure will be 500 psi. The pipeline will be hydrotested to 750 psig. A natural gas orifice meter will be installed at the point where the pipeline joins the Williams Company gathering system.

Bonneville Fuels CDP #2 gather gas from the following wells
