MaryEllen,

I have no clue what happened with this well but if you look in the WC table there are 3 rows, 2 of which have prop# 19674. If you look on the C102 screen, the name of the prop is blank. I am not sure what happened there but if you can figure out what it should be I'd be happy to fix it.

Also could you please look into API# 30-045-28830, POOL# 71629 according to the operator it is part of PROP# 5965 Mudge A, according to ONGARD's C102 screen we show it as #15422 it has been reported like this since 1/94 and is still being reported today as #5965. Let me know what you come up with on this one.

Thanks,

Fran

OSC ?
Talk to Frank to see if C-104
we need Dreyfus to send ~~name~~
to chg a correct prop name
to Mudge A instead of
"Mudge A 6"

25773

9/25/98

Per Frank - change prop
back to Mudge A #5965

Did name chg in Ongard
on 9/25/98
