If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Merrion Oil and Gas proposes to change the pipeline material submitted in the approved sundry notice dated August 14, 1997 and approved September 18, 1998 (copy attached). We propose to construct the line from polyethylene pipe, Schedule SDR-11, HDS800. The line will be pressure tested with natural gas to 100 psi. All other data provided on the previous sundry will stay the same. Plastic pipe specifications are listed below:

Size	OD	Wall (in)	Hydrostatic Design Stress
2"	2.375"	0.216	800 psi
3"	3.5"	0.318	800 psi

14. I hereby certify that the foregoing is true and correct

Merrion requests that a gas sales line ROW on-lease be approved as part of the APD process. We have attached a topo map which depicts the route for a gas sales line to the north of the proposed location. We propose to tie-in to EPFS's low pressure system Lateral 10E-1 as shown on the map. This low pressure system has a MAOP of 100 psia; typical operating pressures are in the 40 psi range. The entire route will be located on lease and is about 2100 feet long. The proposed sales line will be buried steel line, either 2-1/2", 3" or 4" depending upon the completion results. Specs for different size lines are included below.

Size	OD	PPE	Wall, in	Yield, psi
2-1/2"	2.875"	5.79	0.203"	4940 psi
3"	3.5"	5.58	0.156"	3120 psi
4"	4.5"	7.24	0.156"	2730 psi

COPIES: BLM+4, LAND+1, ACTG+1, WELL FILE+1

14. I hereby certify that the foregoing is true and correct
