13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion requests approval for the following modifications to the approved APD:

1. Plan to drill an 8 $\frac{3}{4}$ " surface hole instead of a 9 $\frac{7}{8}$ " surface hole. We will cement to circulate back to surface.
2. Propose to use a bag-type preventer in 1000-psi service. Request a waiver from Order 2 requirements because the well is shallow and low pressure (Pressure not expected to exceed ~320 psig at wellhead).
3. Request exception to requirement for an upper kelly cock valve; pull-down rig will be used and will not allow use of kelly cock valve.

If further is required, please advise.
