13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximated duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy, Inc proposes to surface commingle this well per the attached documents. The flowline will follow existing lease roads as shown on the attached topographic map. Total length is approximately 1,800'.

RE: Administrative Approval to Surface Commingle
Dawson Federal #1 & Dawson Federal #1B
Sec 26, T-27-N R-8-W
San Juan County, New Mexico

Dear Mr. Catanach,

XTO Energy, Inc. (XTO) requests administrative approval to surface commingle the Dawson Federal #1 and the Dawson Federal #1B. The Dawson Federal #1B will be new Blanco Mesaverde well.

Both wells are located on the same Federal Lease #NMSF - 078480. Since all working, revenue and royalty interest owners are common interest owner notification was not necessary. The Bureau of Land Management (BLM) has requested that central tank batteries be utilized to minimize land disturbance whenever possible. Production allocation testing is described on the attached document.

The following are enclosed for your review of the proposed surface commingling.

1. Well information table.
2. Battery schematic of proposed installation.
3. Well location plat.
4. Proposed testing schedule and procedure for allocation purposes.

If you need additional information or have any questions, please give me a call at (505) 324-1090.

Sincerely,
XTO ENERGY, INC

Darrin L. Steed

Proposed Testing Procedure and Schedule

The Dawson Federal #1B will have all oil, water and gas commingled at the Dawson Federal #1 separator. Allocation of oil, water and gas between these two wells will be determined on a semiannual basis. Since the Dawson Federal #1B is a new well and more prone to production rate variance it will be shut in during testing. The Dawson Federal #1 was completed in 1966 as a dual Basin Dakota and Blanco Mesaverde well. In 1999 the well was downhole commingled and put on rod pump. The Dawson Federal #1 is better able to maintain a stable production rate over the proposed six month allocation period.

The Dawson Federal #1B will be shut in until a stabilized production rate is obtained from the Dawson Federal #1. All oil and water production will be measured daily to obtain average volumes for allocation. This daily average volume will be allocated to this well for a six month period following each test. Once testing is completed the production from the Dawson Federal #1B will be determined by the following equation:

Gas Production = Volume @ meter #75697 + Fuel Usage – Dawson Federal #1 allocation.

Oil and Water Production = Total volume for each product – Dawson Federal #1 allocation.

Well Information

	Dawson Federal #1	Dawson Federal #1B
Location	Sec 26D, T27N, R8W	Sec 26E, T27N, R8W
Formation	Mesaverde/Dakota	Mesaverde

COMMINGLING ORDER PC-1056

XTO Energy Inc.
2700 Farmington Avenue
Building K, Suite 1
Farmington, New Mexico 87401

Attention: Mr. Darrin L. Steed

The above named company is hereby authorized to surface commingle the following pools and acreage within the same lease:

Existing Well: Dawson Federal Well No. 1 (API No. 30-045-11873)
Previously Downhole Commingled in the Blanco-Mesaverde (Prorated Gas 72319) and the Basin-Dakota (Prorated Gas 71599).
Dedicated to the W/2 of Section 26, Township 27N, Range 8W NMPM

New Well: Dawson Federal Well No. 1B (API No. 30-045-30886)
Blanco-Mesaverde (Prorated Gas 72319)
Dedicated to the W/2 of Section 26, Township 27N, Range 8W NMPM

Both wells are located in San Juan County, New Mexico. These wells all have common ownership and are located on the same Federal lease No. NMSF - 078480.

Production shall be allocated as follows: The existing Dawson Federal Well No. 1 separator shall receive combined (oil, gas, and water) flow streams from both wells. Total sales gas shall then be compressed and sold through the existing CDP. Oil shall be trucked to sales water to disposal. Oil, gas, and water production shall be allocated based on periodic individual well tests. Compressor and pumping unit fuel gas usage shall be estimated and allocated as appropriate between wells.

NOTE: This installation shall be installed and operated in accordance with the applicable provisions of Rule 303 of the Division Rules and Regulations and the Division "Manual for the Installation and Operation of Commingling Facilities." It is the responsibility of the producer to notify the transporter of this commingling authority.

FURTHER: The operator shall notify the supervisor of the Aztec district office prior to implementation of this commingling operation.

Administrative Order PC-1056

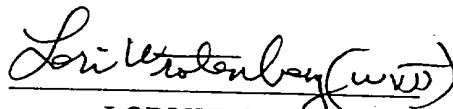

XTO Energy, Inc.

April 12, 2002
