South Blanco-Pictured Cliffs
(Field)

San Juan
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (To be reported later.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to a total depth of approximately 2300' with production anticipated from the Pictured Cliffs formation. Rotary tools will be used to total depth.

The proposed casing program is as follows:

SIZE	AMOUNT	CEMENT
8-1/8	140'	Circulate to surface
5-1/2	2300'	100 sacks

Copies of location plat are attached. Upon completion of this well casing logs taken will be forwarded.

Verbal approval 5-4-57 McGrath to Bauer.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
