If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A second approval is requested to retain this well in its present temporarily abandoned status. It is being evaluated as a possible candidate for a rework either in the Gallup, Mesa Verde or Pictured Cliffs formations. At the time the well was shut in, the bradenhead was left open. Periodical checks indicate that no damage has occurred to the casing strings and there has been no leakage of any substances at the surface which might cause land damage.
