

MARATHON OIL COMPANY

Surface Use and Operations Plan  
Ohio Government #4-15  
Sec. 15, T28N, R11W  
San Juan County, New Mexico  
5,620' G.L.

1. Existing Roads:

Highway south from Bloomfield, New Mexico, for approximately 4 miles. Well location is 1/16 of a mile to the east, next to the highway.

2. Access Road:

The attached map shows the new access road, which will be approximately 1/16 mile long and 14' wide.

There will be a need to cut the fence. An asphalt apron on the highway and a cattle guard or gate will be needed. This proposal will be discussed with BLM, and their advice will be taken.

3. Location of Existing Wells:

See attached sheet.

4. Location of Production Facilities and Service Lines:

Marathon Oil Company does not own or operate any oil or gas gathering lines, injection lines, or disposal lines within a 1 mile radius of the well.

The proposed well will have one tank, one - two-stage separator, and a 10' square by 6' deep water disposal pit. The water disposal pit will be fenced. The gathering line will be laid by the purchaser to their line.

The reserve pit will be fenced on three sides while drilling and the 4th side will be fenced after the rig moves off. The reserve pit and unused parts of the location will be graded back to contour and seeded as recommended by BLM.

All above ground equipment will be painted a color that closely matches the Federal Standard #595-36357 (sage gray).
