17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Amoco Production Company plans to install a wellhead compressor on the subject well to enable the well to produce into sales line. The well is currently unable to produce against the average line pressure of 175 psig. The compressor to be installed is a 180 BHP Ajax Model DPC-180. The compressor will be installed on the existing location so as not to disturb new land and will be located upstream of the Gas Company of New Mexico meter run.
