Gas Pipeline R-O-W Route Change for Lucerne #3

Dugan Production Corp. requests approval to change the pipeline R-O-W route that was approved in APD dated 10-29-96. Dugan requests approval to construct an on-lease buried 2-7/8" diameter steel pipeline, 2300' in length and 30' in width, parallel with existing road, from Dugan's Lucerne #3 to El Paso Field Services lateral 73324-H, located in the NW/4 Sec. 17, T28N, R11W. Anticipated pipeline pressures will be approx. 30-40 psi. The proposed pipeline will be pressure tested to 150 psi. This pipeline R-O-W route change request is due to the area's natural gas transportation and marketing opportunities. Please refer to map which is attached and San Juan Archaeological survey report dated 11-15-96.
